

I went to the forms website and was able to login with this user no problem.

A web login form for Laserfiche Forms. It includes fields for 'User name' (containing 'afang') and 'Password' (masked with asterisks). There is a 'Forgot password?' link, a green 'Sign In' button, a checkbox for 'This is a public computer', and an 'OR' separator. Below is a 'Sign in with:' section with a blue 'Windows Authentication' button.

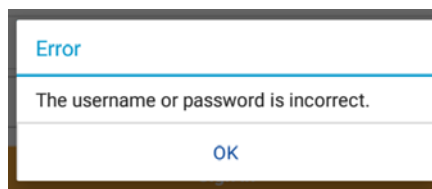

Below is what I'm getting with the mobile app using the same credentials.

A mobile app login screen. It features the Laserfiche logo (an orange square with a white 'L'). Below the logo is a field for 'Account ID or Mobile Server URL' containing 'https://fweb.tompkins-co.org/forms'. There are two buttons: an orange 'Connect' button and a white 'Offline mode' button with an orange border.

A mobile app screen titled 'Repository and Forms Server'. It prompts the user to 'Select the repository and/or Forms server you want to connect to'. There are two dropdown menus: the first is set to 'None' and the second is set to 'LFWeb'. Below the dropdowns is an orange 'Select' button.

A mobile app 'Sign in' screen. It shows 'Forms Server: LFWeb' and 'You are signing into:'. Below this are input fields for 'afang' and a password (masked). An orange 'Sign in' button is at the bottom.

This is how mobile is set up on the server.

A screenshot of the 'Laserfiche Mobile Server Configuration' window. The 'Repository Settings' tab is active. It shows a 'Repository' dropdown set to 'TompkinsCounty'. Below are fields for 'Document location', 'Document name' (set to 'FORMS-00101'), and 'Default volume' (set to 'DEFAULT'). There are checkboxes for 'Authenticate via' and 'Disable "Remember me"'. At the bottom, there is a table for 'Laserfiche Forms Server' with columns for 'Default', 'Forms server name (optional)', 'Forms server URL', and 'Single Sign-On'. The table has one entry with 'LFWeb' as the name and 'https://fweb.tompkins-co.org/Forms/' as the URL.
