

Insert Image On Pdf ⚙

Activity Name

Activity Description

This activity will allow you to insert an image onto a PDF document. Use this for adding signatures or other types of images into a PDF.

Page Number

Signature String

Signature Base1

sig LLX

sig LLY

sig URX

sig URY

field LLX

field LLY

field URX

field URY

Laserfiche Folder

Output File Name

Specify page on which the image will be inserted

Text to be inserted

Base64 of image to be inserted

Position and dimension of the image.

Lower Left corner on the page is 0

Eg: in the sample the image is in the lower left corner and is 150px wide and 100px high.

Position and dimension of the text – **Signature String.**

Same applies as for the image. If all fields are 0, the string won't be shown, however Signature String token cannot be empty.
