YCIL02	Aaron Alarcon	COMPLETED

Weekly Safety Tailgate Topic

(WE 03/07/2026)

Prevención de Enfermedades de Calor

- Es importante mantenerse hidratado durante la el día. Aunque no tengan sed – tome agua cada 15 minutos. No espere hasta que tenga sed.
- Durante una ola de calor usted está a mayor riesgo de enfermarse. Este pendiente de sus compañeros de trabajo y toma agua más frecuentemente.
- Reconoce los primeros signos de deshidratación o estrés por calor, por favor repórtalo si te sientes mal.
- Descanse en sombra adecuada para tomar alivio del calor. Reporte cualquier condición insegura: falta de agua o sombra.
- Sepa dónde está trabajando en caso de que necesite llamar al 9-1-1.
- Evite el café, no tome bebidas alcohólicas, elija agua en lugar de sodas.

Consejos de Seguridad para Evitar Accidentes

- Identifique el botón de emergencia y cordones de emergencia (E-Stop) más cercanos. En caso de emergencia, active el E-Stop inmediatamente.
- *Trabajadores:* No camine, gatee, ni se pare entre un transfer de carga. Solo personas autorizadas con equipo de protección personal deben de activar el transfer.
- *Operadores:* Asegúrese de que las cargas estén estables antes de iniciar el transfer.
- Observadores "Spotters" necesitan estar en las alas cuando es requerido. Use su EPP.
- Antes de comenzar cualquier movimiento de corte, asegúrese de que su mano libre esté apartada. Tenga cuidado al cortar cerca de tuberías de riego; golpear un objeto podría provocar que el cuchillo retroceda hacia usted.
- No se pare cerca de las plataformas cuando empleados estén bajando pallets o materiales; los artículos pueden volverse inestables y caerse de la plataforma.
- Preste mucha atención a las señales de advertencia de seguridad y siga todas las instrucciones de seguridad.

No arriesgue su seguridad inútilmente!

Safety Tips for Heat Illness Prevention

- It is important to stay hydrated through the workday, drink plenty of water. Drink water, even if you are not thirsty every 15 minutes. Do not wait until you are thirsty.
- During a heat wave you are at greater risk of getting sick. You need to watch yourself and coworkers more closely and drink water frequently.
- Recognize the early signs of dehydration or heat stress, please report if feeling unwell.
- Take rest breaks in the shade to cool down. Report any unsafe conditions: lack of water or shade.
- Know where you are working in case you need to call 9-1-1.
- Avoid coffee, do not drink alcohol, and choose water over soft drinks.

Safety Tips to Avoid Accidents

- Identify your nearest emergency stop button and emergency pull-cord (E-Stop). In the event of an emergency, activate E-Stop immediately.
- *Employees:* Do not walk, crawl, or stand between active load transfers. Only authorized personnel with personal protective equipment should perform transfers.
- *Operators:* Ensure that all loads as stable before initiating transfer.
- Spotters need to be present at the wings of the harvester when being moved or repositioned. Wear your PPE.
- Before beginning any cutting motion, ensure your free hand is out of the way. Use caution when cutting near irrigation pipes, striking an object might cause knife to kick back towards you.
- While walking, hold the knife handle, keep the tip pointed down, and walk carefully. Stay alert for coworkers who may be on your travel path. Never run, jump, or horseplay with a knife in hand.
- Pay close attention to safety warning signs and follow all safety instructions.

Don't Take Unnecessary Risks with Your Safety!
