

## ON SQL SERVER

The screenshot shows the Windows Event Viewer interface. The left-hand pane displays the 'Event Viewer' tree with 'Application' selected. The main pane shows a list of events from the 'Application' log. The event list includes various information and error events from different sources like MSSQLSERVER, MSDTC, and VMUPG. The event 'Event 18456, MSSQLSERVER' is selected and its details are shown in the bottom pane. The details pane shows the message: 'Login failed for user [redacted]@[redacted]. Reason: Failed to open the explicitly specified database, [redacted]'.

Event 18456, MSSQLSERVER

General Details

Login failed for user [redacted]@[redacted]. Reason: Failed to open the explicitly specified database, [redacted]

## ON LF SERVER

The screenshot shows the Windows Event Viewer interface. The left-hand pane displays the 'Event Viewer' tree with 'Application' selected. The main pane shows a list of events from the 'Application' log. The event 'Event 10050, LFS' is selected and its details are shown in the bottom pane. The details pane shows the message: 'Database statement execution error encountered. Session ID: [redacted]; Dialog ID: [redacted]; Repository: [redacted]; CLI routine: BuildAccessToken; Message: [Microsoft][SQL Native Client]TCP Provider: An existing connection was forcibly closed by the remote host. SQL Statement: 'select trustee\_id, trustee\_name, privs, uif, auditmask, readonly from trustee left outer join account\_security on trustee.sid = account\_security.sid where trustee\_name = ?'; SQL variable: ''; SQL State: 08S01'.

Event 10050, LFS

General Details

Database statement execution error encountered. Session ID: [redacted]; Dialog ID: [redacted]; Repository: [redacted]; CLI routine: BuildAccessToken; Message: [Microsoft][SQL Native Client]TCP Provider: An existing connection was forcibly closed by the remote host. SQL Statement: 'select trustee\_id, trustee\_name, privs, uif, auditmask, readonly from trustee left outer join account\_security on trustee.sid = account\_security.sid where trustee\_name = ?'; SQL variable: ''; SQL State: 08S01'

This screenshot is similar to the previous one, showing the Windows Event Viewer interface. The left-hand pane displays the 'Event Viewer' tree with 'Application' selected. The main pane shows a list of events from the 'Application' log. The event 'Event 10050, LFS' is selected and its details are shown in the bottom pane. The details pane shows the message: 'Database statement execution error encountered. Session ID: [redacted]; Dialog ID: [redacted]; Repository: [redacted]; CLI routine: BuildAccessToken; Message: [Microsoft][SQL Native Client]Communication link failure: SQL Statement: 'select trustee\_id, trustee\_name, privs, uif, auditmask, readonly from trustee left outer join account\_security on trustee.sid = account\_security.sid where trustee\_name = ?'; SQL variable: ''; SQL State: 08S01'.
